

Electric Construction Tourism Industry and Trade Limited Co. Pump Control Systems

We manage water. You can use it safely. BPL-U CONTROL PANEL

(6

1. General Product Informations

The BPL-U control panel has the opportunity to monitor and control the operating status and error details of the pumps in single booster systems and submersible systems. The Panel includes a specially designed mainboard and 2 units of 7 segment display. System parameters can be easily adjusted from the setting menu with the Set / Up / Down buttons. There is on-off switch on the panel. The system can be turned on and off without opening the panel door through this switch.

Specifications

Microprocessor based design. 1 Hydrophore, deep well (submersible) mode. Ability to set the time of well filling in deep well (submersible) mode. 3 4 2 units of 9,2mm 3 digit 7 segment display 5 Ability to display voltage values on screen 6 Ability to set the high voltage and Low Voltage Protection value 7 Ability to display pump current values 8 Ability to set high current and low current protection values 9 Ability to set error delay time. 10 General Error / Waterless Operation and Pressure Switch Signal Warning LEDs Protection against waterless operation with floater 12 Additional low current protection against waterless operation 13 Ability to display all error conditions 14 Notifying error conditions with buzzer and relay contact.
